T2A2 – Marketplace Project Presentation

Jonathan Tan

Problem in the market

Due to the arise of COVID pandemic during the year 2020, this had changes the new norm of many of people started to work from home instead of going back to their respective office or having a hybrid model work from home and office. Because of this, office and printing products have seen a significant increase in demand from officer workers. Hence the market can not catch up with the supply side of things.
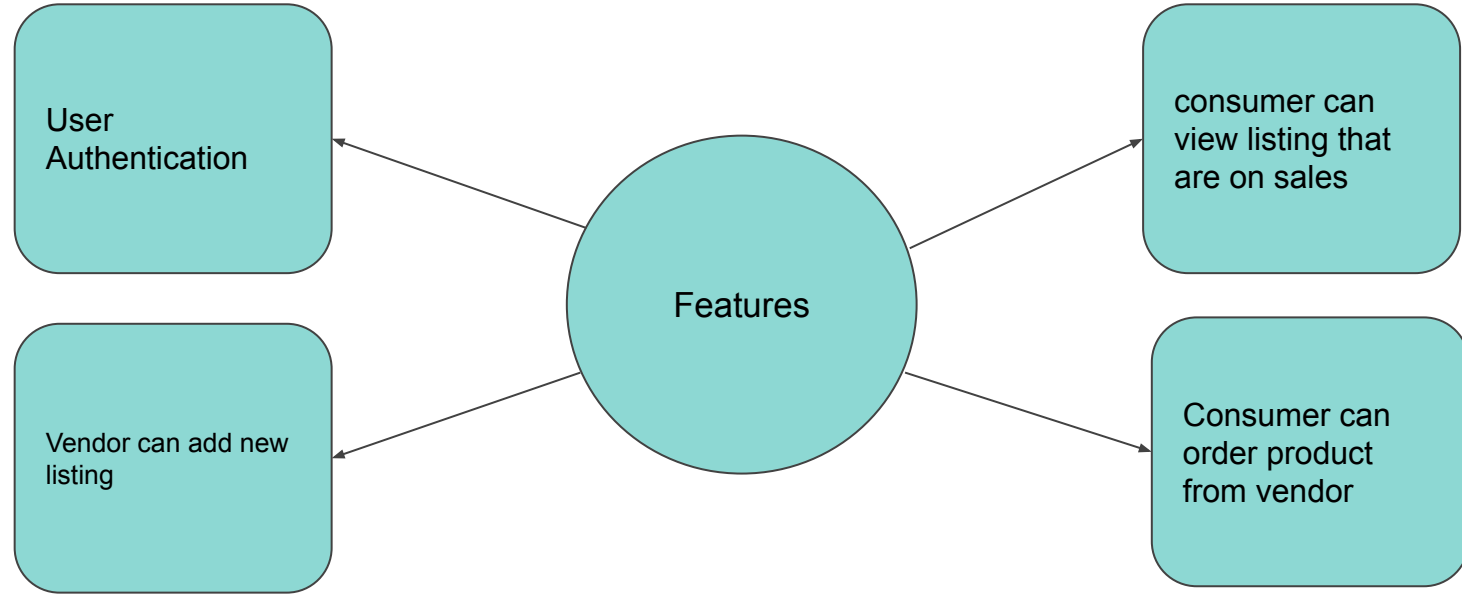

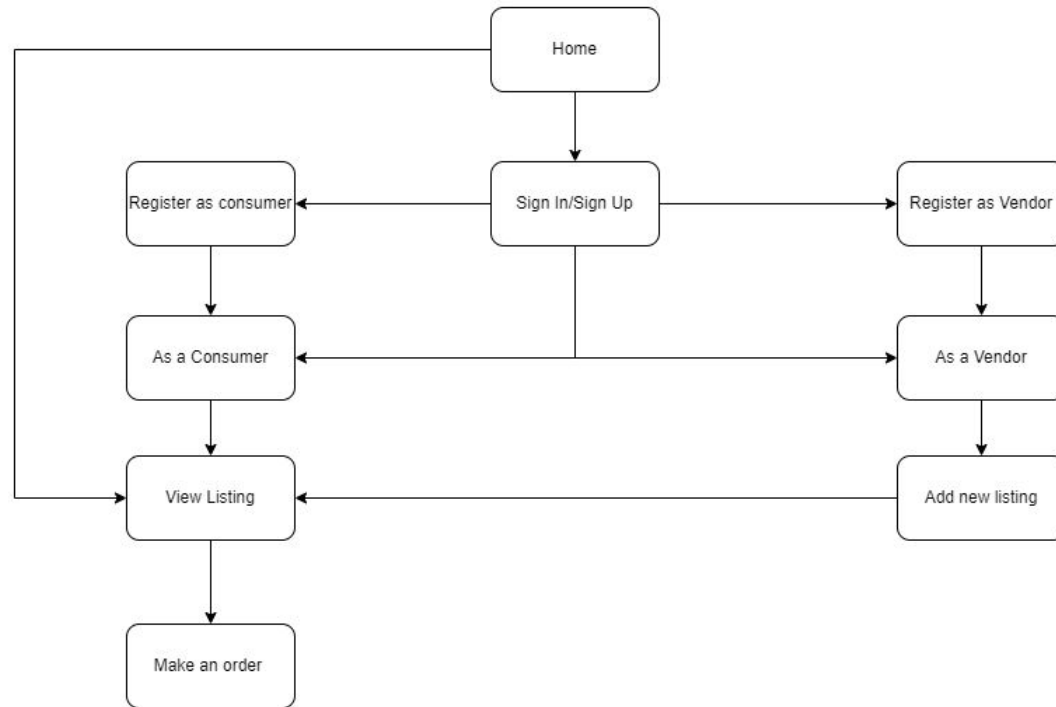

Solution for the market

this platform aim to address those challenges and help the printing industry to be more competitive and ease the supply and demand of the market.
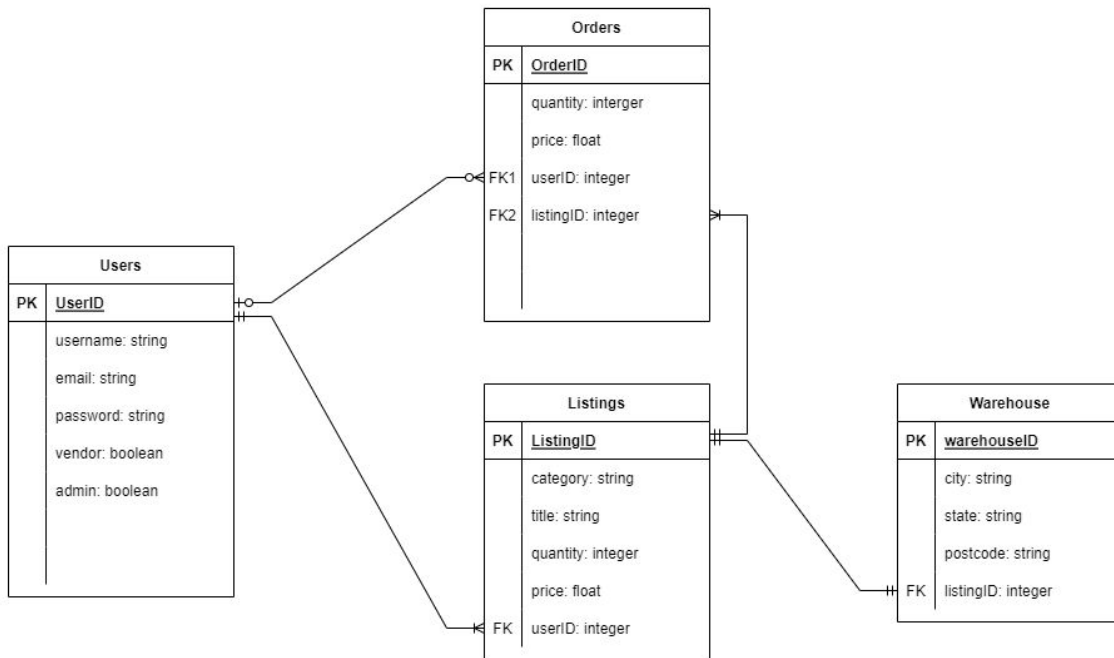

Main Feature

User Authentication

consumer can view listing that are on sales

Features

Vendor can add new listing

Consumer can order product from vendor

SiteMap

Entity Relationship Diagram

Development Process

Walkthrough of the process of building this website

Challenges/ Obstacles →
- Debugging
- Clash with work commitment

Least Favourite →
Adding in condition inside the code, where it always crash my program

Most Enjoyable →
When code is working
